---

SUMMARY

Enthusiastic and detail-oriented fresher with a passion for problem-solving and creating innovative solutions. Proficient in languages like Python, java and C, with hands-on experience in project development using tools like SQL. Adept at building user-focused applications and developing efficient solutions for diverse technical challenges.

EDUCATION

Mater of Computer Applications (MCA) — March 2027(cumulative)

JSS Academy of Technical Education | VTU — GPA:9.0/10

Bachelor of Computer Applications (BCA) — May 2025

SDC College Kolar | Bengaluru North University (BNU) — GPA: 9.29/10

Class XII (Pre-University) — May 2022

Narayan PU College, Kolar | Board of Pre-University Education, Karnataka — GPA: 80.88/100

Class X — May 2020

B.E.M.L Comp Junior College, KGF | State Board, Karnataka — GPA: 84.32/100

TECHNICAL SKILLS

- **Programming**: Python, SQL, C
- **Frameworks & Tools**: Django, Power Point, VS code
- **Development Concepts**: Object-Oriented Programming (OOP)

PROJECTS

- **Inventory Management System:** I worked on developing a full-stack project using Python and the Django framework. The project, an Inventory Management System, aimed to streamline inventory tracking, automate stock management, and improve efficiency. I handled both back-end development with Django and front-end integration, ensuring seamless data flow and user-friendly interfaces.
- **Real-Time Currency Converter | Python, REST API, JSON:** Developed a real-time currency converter application using Python by integrating an Exchange Rate API to retrieve live exchange rates. Implemented accurate currency conversion logic by parsing JSON responses from the API and performing real-time calculations. Incorporated input validation and error handling to ensure reliable performance and improve the overall user experience.

INTERNSHIPS & SIMULATIONS

- **MIT Training Academy**: During my internship at MIT, I worked on developing a full-stack project using Python and the Django framework. The project, an Inventory Management System, aimed to streamline inventory tracking, automate stock management, and improve efficiency. I handled both back-end development with Django and front-end integration, ensuring seamless data flow and user-friendly interfaces.

CERTIFICATIONS

- Bajaj Python course
- Certificate of internship
- IBM Machine Learning with Python
- IBM Learn Programming with JavaScript
- IBM Web Development Fundamentals
- IBM AI Literacy
